Introduction

Focal Solutions Inc. is a non-woven fabric manufacturer. We have been producing and exporting a variety of Spun bond & Spun-less Non-Woven Fabrics. The properties of the fabric are breathable, soft, light, chemical resistant, nontoxic, and environment friendly. These products are used in various industries including Hospitals, Packaging, Food, Shoe Industries, Agriculture, Rice & Pulses Industries, Tea Industry, Furniture market and Carpet Manufacturing, Auto Industries etc.

Our product portfolio ranges from spun bonded and spun-lace non-woven fabrics to needle punched non-woven geo-textiles. We specialize in manufacturing an impressive range of fabrics for a wide variety of applications such as interlinings, filtration systems, medication and waterproofing fabrics, and geo-textiles. Our finished products cover almost the whole spectrum of end uses of non-woven.

Focal Solutions Inc. believes that a successful business requires training, discipline & hard work, any business conduct can be ethical only when it rests on the core values of Honesty, Respect, Trust, and Responsibility. The firm conducts business with integrity, in compliance with applicable laws and in a manner that excludes considerations of personal advantage.

Why Us:

- Leading edge technology.
- Excellent quality domain.
- Recruiting experienced Technical Team.
- Customized Products.
- Timely delivery.
- Competitive prices.
- Using with high quality raw materials.
- Running advanced machinery / equipment.

Value Added Features:

Our factory has a production line of lamination, we can make the water resistant non-woven fabric. Now can add some additives or particles of the fabric to improve the effectiveness of fabric, such as retardant, anti-bacterial, anti-allergy and so on.
Our Mission:

Our main objective is to establish customer satisfaction into the domain of manufacturing and exporting of high quality non-woven fabrics. The company is well established both domestically and internationally. Our company has proven record to the demand of the clients by providing high quality products and prompt services & we are still reaching new heights of success and has maintained the reputation in the business. The firm conducts business with integrity, in compliance with applicable laws and in a manner that excludes considerations of personal advantage.

Customer Satisfactions:

Setting us distinct from our competitors is the comfort and satisfaction that our clients feel after they work with us. We have entertained each of our clients over the years a personalized services and by being flexible in various aspects of the business we have fulfilled our client’s needs consistently in cost, time and quality. Due to transparent business ethics we have built a good and healthy relationships with our clients. Our client’s satisfactory trust and repeated orders is a proof of our reliable services. We make our great efforts to deliver a good quality products and services with an effective cost to our clients.

Quality:

Focal Solution Inc. as a quality balanced company which gives the surety that only the best product may reach the customers. Our products are being tested through various frameworks to make sure the perfect range of production. A disciplinary quality check is organized from the initial level to the final delivery of the products. Our quality supervisors sharply invigilates each and every aspect to provide international quality range of fabric. Our customers likes our commitment towards their requirement and very close judgment towards their needs.

Quality is a word we use often. But here, we mean it.

Our Sales Process:

We clearly understand that quality is definitely number one concern for European markets. We sell quality and that is why we have approached your company. In order to establish mutually beneficial relations, we would suggest a phase wise plan to you as follows:

- We send you samples as per your requirement.
- Upon approval of samples, you may place a very small trial order to us.
- On successful execution of the trail order you may very slow increase the quantities.
- You may also visit our manufacturing factory any time, we can provide you pickup, visit and drop facility to you.
Focal Solution Inc. using China based technology and is growing day by day. We source our raw material from credible suppliers and evaluate them on numerous factors before use. The whole production is carried out in a leading edge technical production unit, and each stage is driven constantly by our quality control experts. If you requirement is in any of our product range, please feel free to send us inquiries.

Here at Focal Solution Inc. our quality of non-woven fabric is technically processed:

- Whole Operation controls with quality checks at every level from off-loading to raw material to consignment of goods.
- To coordinate with our clients and provide contemporary results.
- To hand-over quality products regularly and build up customer relations.
- In result of this practice the fabric from the spun bond process meets the most demanding standards.

Fabric Production Factory:

There are more than 80 workers in our factory and we have 4 nonwoven productions lines. Two production lines of 240cm width, one line of 200cm width and the other one is 160cm width.

We can produce a variety of color and weight nonwoven fabrics. The production capacity of the 4 lines is 600 Tons per month. We can make the fabric rolled on tubes—big rolls and mini rolls. Also can make the folded fabric then packed into printed bags or bags with printed paper and hook.

Finishing of Products:

Our workshop can make the finished non-woven items.

We have 4 lines of ultrasonic wave machine. They can be used instead of the sewing machine to stitch. Waterproof effect can be further processed. So that no leakage.

We can fulfill according to customer’s requirements. You can send your samples to us, we will make the counter samples for your reference with our best price.
**PP Spunbond Nonwoven:**

PP Spun-bond Non-woven Fabric 15 gm to 150 gm is a Non-woven Fabric that is a fabric-like material made from long fibers, bonded together by chemical, mechanical, heat or solvent treatment. PP Spun-bond Non-woven Fabric involves a continuous process, which convert thermoplastic raw material (polypropylene) into a web composed of continuous filament. It is highly versatile and meets the needs of diverse range of products, and is fast replacing traditional fabrics. Spun-bond is safe, reliable, convenient and comfortable to use. It is highly versatile and meets the need of diverse range of products like medical, hygienic and industrial market application. The properties of the fabric are breathable, soft light, chemical resistant, nontoxic and environment friendly.

- **Name:** 100% polypropylene.
- **Width:** Up to 240 cm.
- **Weight:** 15 to 200 grams per square meter.
- **Color:** All colors for optional or customized.
- **Features:** Water proof, Moth-proof, Eco-Friendly, Breathable, Anti-bacteria.

**Polyester/Viscose Spunlace Nonwoven fabrics:**

Spunlace Nonwoven fabrics.
- **Material:** 100% Polyester/Viscose or mixed.
- **Weight:** 15 to 200 grams per square meter.
- **Width:** up to 240 cm.
- **Color:** White/Black/printed /Dyed in colors.
- **Melt blown and Composite.**
- **Max width 1,100 mm.**
- **High performance of Bacteria Filtration Efficiency (99.8%BFE).**
- **Online laminating line to make composite products.**

**Geo Textiles:**

Made of 100% PP stable fiber.
- High UV and Abrasion Resistance.
- Stable in pH range of 2 – 13 and resistant to biological degradation.
- **Available weight starting from 120.**
- **Tensile strength of up to 75 KN/m.**
- **Protection and Separation applications.**
- **Excellent clogging resistance.**
Hygiene Non Woven Fabric:

We offer a comprehensive range of high quality Hygiene Fabrics, which is fabricated for providing health, comfort and hygiene. This Non-woven Hygiene Fabrics finds usage in various applications like Diapers (Baby and Adult), Face wipes, Sanitary Napkins, and Other Feminine hygiene products. Our Non-woven Hygiene Fabrics is very beneficial and provides good coverage, excellent moister transport, and comfort to wearer. It is very soft on sensitive skin, dry and safe.

Features:
- Dermatological neutral.
- Light weight and soft.
- High strength wet and dry.
- Excellent strike through re-wet properties.
- Hydrophilic and hydrophobic.
- Free from chemical agents.

Laminated Non Woven Fabric:

We offer Laminated Non Woven Fabric, which is widely used in various industries for manufacturing bags, table clothes and other utility items. The various bags and other items made using Laminated Non Woven Fabric ensure high strength. Our Non Woven Fabrics with/without liners are available in various sizes and quantity as per customers’ requirement. Further, we serve Non Woven Fabrics in Multi-color printing.

Hydrophilic Non Woven Fabric:

We are involved in manufacturing and supplying an extensive variety of Hydrophilic Non woven Fabric. We are amongst the leading manufacturers and exporters of premium quality Non woven Fabric for Hygiene. Our exclusive variety of hydrophilic non woven fabric has found a wide application in pharmaceutical Industry, Hygiene Products and wipes. We have established our selves as well reckoned hydrophilic non woven fabric and spunbond non woven fabric for packing industry. Some of the attributes of our products are:

Specifications:
- Dry.
- Safe.
- Light weight.
- High strength.
- Soft of Skin.
- Air Permeable.
- Disposable.
For Medical:

100% Polypropylene Spun bond Non-Woven Fabric & Finished Items.

Emergency Blanket.
Bed Sheet.
Disposable Isolation Gowns.
Pillow Case.
Face Masks.
Surgical Drapes & Wraps.
Bed Linen.
Shoe Covers.
Stretcher Cover.
Coverall.
Emergency Stretcher.

For Home & Living:

100% Polypropylene Spun bond Non-Woven Fabric & Finished Items.

Normal Mattress Protector.
Water Resistant Mattress Protector.
Furniture & Photo Frame Covers.
Pillow & Bolster Cases.
Table Cloths.
Bedding: Quilting, Spring Pocket, Flanging, Base Panel.
Carpet Underlay.
Curtains.
Laundry Bags.
Anti-Bacterial Mattress Protector.
Ultrasonic Quilting Mattress Protector.
Wipe.

For Agriculture & Horticulture:

100% Polypropylene Spun bond Non-Woven Fabric & Finished Items.

Cover with UV.
Greenhouse Shading.
Crop Covers & Plant Protection.
Fruit & Vegetable Covers.
Weedmat.
Soft of Skin.
Air Permeable.
Disposable.
For Automotive & Vehicle:

100% Polypropylene Spun bond Non-Woven Fabric & Finished Items.

Car Seat Backing.
Car Headliners.
Car & Motorcycle Covers.

For Packaging & Miscellaneous:

100% Polypropylene Spun bond Non-Woven Fabric & Finished Items.

Shopping Bags
Bag & Shoes Case
Airplane Head Rest Cover
Gift / Flowers Wrapping
Cable Wrapping
Art Canvases

Fabrics for Agricultural

Agri Fabrics are best quality Non-woven Fabrics, which are made from polypropylene. This Agricultural Fabrics is obtained by spinning the material into fine filaments and bonding them by heat without use of any binders. This is an economical and environment friendly polymer. Moreover, this is a modern textile which is neither a film or a conventional textile.

Agricultural Fabrics are Non-woven Agri Fabrics made from polypropylene an economical and environment friendly polymer by spinning the material into fine filaments and bonding them by heat without use of any binders. It has specialized UV absorbent incorporated in it which ensures protection against the sun’s rays.

Non-woven Agri Fabrics create a micro-climate providing uniform ventilation thereby encouraging early growth and development of the plant and/or crop with the valuable end result of both improvement in quality and yield. They protects the plant from cold and frost. Up-to 5 degrees C some circulating moisture is trapped by it and in the event of a frost this film freezes providing the plant with natural frost protection. It minimizes the dangers caused by hail, heavy rains and storms. This Non-woven Agricultural Fabrics is almost 80% transparent and water permeable. Plants covered with Non-woven Agricultural Fabrics can be fertilized afterwards if required.
Fabrics for Shoes & Garments

We are involved in offering superior quality fabric for shoes & garments. This Non-Woven Shoes Fabric are used for making Disposable Shoes Covers, Surgeon Shoe Covers and Non-Woven Surgeon Shoe Covers. Our Non-Woven Shoes Fabric are ideal for the skin because they are very soft and accommodating. Our range of Disposable Shoes Covers fabric is environment friendly and user friendly both.

The soles of Non-Woven Surgeon Shoe Covers made by us are of flexible rubber, so they can be worn indoors and out, making them a very versatile choice of footwear. The fabric Surgeon Shoe Covers we manufacture is UV treated, soft on skin, Light weight, Air and water resistant and Light permeable. It protects in climate changes, dematologically neutral and washable. Further, the fabric is used in various applications like Shoe heels, cleaning, patchwork in garments, dust covers and baby dresses.
